SPSS Training

(Value Added Certificate Course)

Summary Report March 2019

The course started on 1-1-2019. There were 11 students enrolled and completed the course. The course was of 30 hrs duration. Students enjoyed the group dynamics and, in their feedback, requested for more such sessions in the future.

Course Outcome:

On completion of this course the participants will develop an ability to independently analyze and treat data, plan and carry out new research work based on their research interest. The course encompasses most of the major type of research techniques employed in academic and professional research which can be seen in syllabus.

Evaluation

Participants will be assessed on practical assignments and tests after the completion of training program. There will be both lab work and two personal assignments. One personal assignment will be a sort of research project that students have to pursue in such a way that after completion of program it's suitable for publication in a good journal. Students are most welcome to bring their own data and problems for discussion in class.

Target Audience:

Graduate, masters and doctoral level students, academic scholars and teachers, market researchers, independent researchers who want to master the skills of data analysis

Course Coordinator: Dr Josheena Jose
